

SUMMARY

Results-driven Backend Engineer with 2+ years of experience building scalable REST APIs and microservices using Node.js, NestJS, and Python. Skilled in PostgreSQL, Kafka, RabbitMQ, Docker, and backend system optimization. Passionate about developing clean, maintainable, and high performance backend solutions.

SKILLS

- **Languages:** JavaScript, TypeScript, Python
- **Backend:** Node.js, NestJS, Django, PHP
- **Databases:** MySQL, PostgreSQL, MongoDB
- **ORMs:** TypeORM, Mongoose
- **Libraries:** Pandas, TensorFlow, OpenCV, Numpy
- **Web Technologies:** HTML, CSS, SCSS
- **Tools/IDEs:** Git, VS Code, Jira, Figma
- **DevOps & Cloud:** Docker, AWS S3, Linux, Git
- **Messaging & Events:** Apache Kafka, RabbitMQ, Event-driven Architecture, Async Processing
- **Testing & Performance:** Apache JMeter (Load Testing)

PROFESSIONAL EXPERIENCE

Daffodil Software Pvt Ltd Jan'24 - Present

- Built **Node.js (NestJS)** and **Python (Django) microservices** for AI model training and dataset management platforms handling **terabyte**-scale data.
- Developed and enhanced **REST APIs** for dataset processing, reducing latency by ~40% through **PostgreSQL** query optimization and **caching**.
- Engineered **Apache Kafka**-based event-driven workflows to improve scalability and asynchronous processing across **microservices**.
- Created **Python** scripts for statistical calculations, data aggregation, and file preview generation without full dataset downloads.
- Integrated various **third party services**, including payment gateways, identity verification, and external APIs.
- Improved **TypeORM** queries and database indexing strategies, enhancing reporting and analytics performance.

EDUCATION

Chandigarh University

Master's Degree in Business Administration
2025 – 2027 (Pursuing)

Chandigarh University

Bachelor's Degree in Computer Science
2020 – 2024

INTERNSHIPS

Persistent Martian-Summer Internship Jun'23 - Aug '23

- Data structures using C
- LINUX and DBMS commands
- Python Programming

PROJECTS

Model-Dataset Management Platform (AI-Summit 26)

Django, NestJS, PostgreSQL, Python, TypeORM, Kafka, Docker

- Built **NestJS** and **Django microservices** for model and dataset lifecycle management, including upload, versioning, and cleanup workflows at terabyte scale.
- Used **Apache Kafka** for dataset processing pipelines and event notifications, enabling non-blocking and high throughput workflows.
- Developed **Python** scripts for server-side statistical calculations and CSV/tabular file preview generation, improving data accessibility and processing efficiency.
- Optimized **PostgreSQL** queries using **joins** and **indexing** to enhance performance for large-scale datasets.
- Integrated **AWS S3** for scalable storage and management of datasets and files.

Lending & Investment Platform

NestJS, MySQL, TypeORM, Docker

- Extended existing lending platform using **NestJS** and **MySQL** — delivered campaign management, credit score validation, investor funding flows, and borrower acceptance workflows.
- Built **RabbitMQ**-driven event handling for 30-day campaign threshold tracking, automated fund disbursement, and investor refunds on campaign failure.
- Integrated **Nafath**, document verification, and Saudi Credit Bureau (**SIMAH**); enforced **TypeORM**-based audit logging across all transaction states for regulatory compliance.

Catering Management System

NodeJS, Express.js, MongoDB, Mongoose

- Built **REST APIs** using **Node.js** and **Express.js** for buffet package customization, menu configuration, and order lifecycle management.
- Integrated the **Paymennt** payment gateway and developed reporting APIs for kitchen and sales staff with QR-based product tracking using **MongoDB**.
- Generated dynamic CSV reports for multiple business and operational use cases through backend automation.

HONORS

- Recognized for exceptional commitment and adaptability in mastering new tools and technologies as required by client projects. Demonstrated the ability to rapidly upskill through research and development, effectively meeting and exceeding client expectations within stringent timelines. Acknowledged for being a reliable and conscientious contributor to the team's success.
- Recognized at Daffodil Softwares for delivering urgent Model module tasks late into the night, beyond regular duties. Praised for dedication, agility, and consistently going the extra mile.
