

SUMMARY

Experienced Software Developer with 1.5 year of expertise in API development, system integration, and backend optimization. A results-driven problem solver, committed to continuous learning and delivering high-performance, scalable solutions. Proven track record of driving successful projects and enhancing system efficiency.

SKILLS

- **Scripting Languages:** JavaScript
- **Backend:** Python, NodeJs, NestJs, PHP
- **Databases:** SQL, Postgres, MongoDB
- **AI/ML:** Data Preprocessing, Model Training, Image/video classification
- **Libraries:** Pandas, Tensorflow, OpenCv, Seaborn, Matplotlib
- **Web Technologies:** HTML, CSS, SCSS
- **Tools/IDEs:** Git, VS Code, Jira, Figma, docker, Kafka, Postman

PROFESSIONAL EXPERIENCE

Daffodil Software Pvt Ltd Jan'24 - Present

- Proficient in JavaScript, Python, Node.js, NestJS, and PHP for backend development.
- Skilled in databases like SQL, PostgreSQL, and MongoDB for efficient data management.
- Kafka for event-driven architecture and Docker for containerization
- Experienced in AI/ML tasks, including model training and image/video classification using TensorFlow and OpenCV.
- Knowledgeable in data visualization tools like Matplotlib and Seaborn.
- Familiar with web technologies: HTML, CSS, SCSS.
- Adept at using development tools like Git, Jira, VS Code, and Figma.
- Committed to deliver scalable, maintainable, and high-performance backend solutions.

EDUCATION

Chandigarh University

Master's Degree in Business Administration
2025 - 2027 (Pursuing)

Chandigarh University

Bachelor's Degree in Computer Science
2020 - 2024

PROJECTS

AI Model Training and Management Platform

NestJS, PL/SQL, Python, TypeORM, Kafka, Docker, Angular

- Developed microservices using NestJS to manage dataset and model management for data science competitions, ensuring scalability and efficient data processing.
- Developed and optimized APIs to process large datasets (terabytes) for dataset management, allowing users to upload, clean, and access data efficiently.
- Implemented Kafka for queue management.
- Built a comprehensive admin portal for seamless management of users, competitions, and dataset operations, improving platform control and user experience.

Loan Management System

NestJS, MySQL, TypeORM, Docker

- Worked on a loan management system (LMS) using NestJS, MySQL, and event-driven architecture.
- Integrated multiple third-party adapters for customer onboarding, document verification, and risk profiles, streamlining the application process.
- Leveraged Docker for seamless deployment and consistent dev environments.
- Implemented audit logging for loan application processing. This comprehensive log captures all critical actions throughout the loan lifecycle, ensuring transparency and facilitating regulatory compliance.

Catering Management System

NodeJS, MongoDB

- Developed REST APIs utilizing the Express framework in Node.js.
- Integrated the Payment payment gateway to handle secure online transactions for catering services.
- Implemented and optimized a dynamic system for users to customize buffet packages or choose from predefined options.
- Built features to support both full-service catering and drop-off services with custom menus/packages.
- Implemented some reports for kitchen-staff, sales-staff, order-summary, products, and dishes with QR etc.

INTERNSHIPS

Persistent Martian-Summer Internship Jun'23 - Aug '23

- Data structures using C
- LINUX and DBMS commands
- Python Programming

HONORS

Who hit home run today?

- Recognized for exceptional commitment and adaptability in mastering new tools and technologies as required by client projects. Demonstrated the ability to rapidly upskill through research and development, effectively meeting and exceeding client expectations within stringent timelines. Acknowledged for being a reliable and conscientious contributor to the team's success.

Kudos to you..!!

- Recognized for delivering urgent Model module tasks late into the night, beyond regular duties. Praised for dedication, agility, and consistently going the extra mile.
